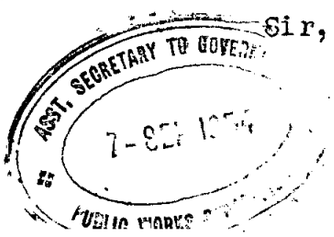
No.646.F/54-7 dated 3rd Sept. 1954



Sir,

Sub: Legislative Assembly Question--
Electricity--Pykara Electricity System--South Kanara Dist.--Extension of supply of power from Mangalore to Puttur.

Ref: Govt. Memo.No.66741.E/54-1 dated 27-8-1954.

There are two villages by name "Puttur" in South Kanara District, one is situated 2 miles north of Udipi Town in Udipi Taluk and another is a major Panchayat 32 miles south east of Mangalore and it is the Head-quarters of Puttur Taluk.

2. A proposal for extension of supply of power to 8 wells and one Industrial in Puttur village north of Udipi Town in Udipi Taluk is already under consideration of the Superintending Engineer, Pykara Electricity System and necessary further action for its sanction is being taken up separately. This will be fed from Udipi Power House(Thermal Station) A major scheme on 10 year basis for extending supply of power to Puttur Panchayat Board area in Puttur Taluk and also villages like Vittla Uppinangadi etc. in South Kanara District is being evolved by the Superintending Engineer, Pykara. But supply of power to these areas will be possible only after power has been made available from the Jog Falls by the Mysore Govt. and this is expected to materialise by about the end of 1955 or in 1956, vide also Govt.'s letter No.26372.E/54-3 dated 2-6-54 addressed to Sri K. Venkataraman Gowda, M.L.A., Advocate, Puttur, South Kanara District.

3. In this connection I may also add that recently the Director of Community Projects has reported that a sum of Rs.15 lakhs will be made available from the Community Project Funds for rural extension schemes in South Kanara Community Project areas(Kundapur, Karkala and Mangalore Taluks) The Superintending Engineer, Pykara has duly been instructed to depute special staff to the above areas and prepare rural distribution schemes to be fed ultimately with Jog Power. On finalisation of extension schemes in these areas the work also will be arranged to be completed so that they will utilise power from 'South Kanara Grid' stations immediately after the Jog power supply is received.
